

iGen News (India Global News)

App Development Blueprint · Master Component List with Details & Suggestions

Based on	Meeting transcript — Feb 12, 2026 + product analysis	Purpose	Master component checklist before individual design/dev docs
Format	Component # · Title · Category · Phase · Key Points · Suggestions	Next Step	Separate detailed design & dev doc per component

Core	Must-have for launch	Pre-Launch	Build before going live	Infrastructure	Backend / tech foundation
Post-Launch	Add after initial release	Future	Roadmap / future version		

A. STRUCTURE & NAVIGATION COMPONENTS

01

Top Header Bar

Navigation · Branding

Core

- ◆ Logo / Brand name "India Global News" — top left; links back to homepage.
- ◆ Global Search bar — top center or right; accepts keyword, sector, country, leader name.
- ◆ Language selector — English default; Hindi and regional languages planned.
- ◆ Notification bell icon — shows unread alerts for subscribed topics.
- ◆ Reader profile icon / avatar — links to Reader Dashboard when logged in.
- ◆ Subscription CTA button — "Upgrade Now" / "Subscribe" — prominently placed top right.
- ◆ Dark mode / Light mode toggle icon.

■ Suggested Additions:

- Add a "Breaking News" ticker/marquee strip just below the header — grabs immediate attention.
- Show reader's active plan badge (Free / Reader / Leader / Corporate) next to avatar.
- Include a "Live" indicator dot when live content (podcast/interview) is streaming.

Note: Header is persistent across ALL pages — desktop and mobile.

02

Mega Menu (Top Navigation)

Navigation · UX Architecture

Core

- ◆ Five main items (left to right): Feed · Headlines · Trending · Categories · My News.
- ◆ Each item has a dropdown sub-menu revealing: Sector News, Country News, Leader News.
- ◆ Default active item on page load: Feed. Default active sub-tab: Sector News.
- ◆ "Categories" dropdown expands to show Sector News page / Country News page / Leader News page.
- ◆ "My News" dropdown shows: My Favourites, My Bookmarks, My Read Later, My Comments, My Likes.
- ◆ Each sub-menu item also contains a cross-navigation link to India Global Expo (IGE).
- ◆ Fully replaces the old side menu — no side menu on desktop.
- ◆ Active state highlighting (underline or colour change) for current selected item.
- ◆ Keyboard accessible (Tab navigation) and ARIA labels for accessibility compliance.

■ Suggested Additions:

- Add a "Top News" placeholder slot (greyed out, label: "Coming Soon") — activates when paid placements go live.
- Show reader's selected category counts in the sub-menu (e.g. "Sector News · 2 selected").
- Mega menu hover effect should show top 3 trending articles per category as a preview panel.
- Include a "New" badge on menu items when fresh content has been added since last visit.

Note: Mega Menu is the single most critical navigation element — all UX flows through it.

03

Side Menu — REMOVED

Navigation · Deprecated

Core

- ◆ The original side menu (Feed, Headlines, Categories, Trending, Search, Newsletter, Global Signal Desk) is fully REMOVED.
- ◆ The left-side real estate freed up by removing side menu is used for article content display.
- ◆ This increases reading area width and follows industry-standard news site layout (NDTV, TOI model).

■ Suggested Additions:

- Use the freed left real estate for a "Editor's Pick" or "Trending in Your Sector" sidebar widget instead.
- Consider a sticky "Quick Links" floating button (bottom right) that expands to key navigation shortcuts for power users.

04

Footer Menu

Navigation · SEO

Core

- ◆ Must be present on all pages — desktop and mobile.
- ◆ Include: About Us, Advertise With Us, Contact Us, Privacy Policy, Terms of Use, Sitemap.
- ◆ Social media links: LinkedIn, Twitter/X, Instagram, YouTube.
- ◆ Company info: India Global Expo News Pvt. Ltd. | CIN / Registration details.
- ◆ Quick links to all three portals: igenworld.com, indiaglobalexpo.com, indiaglobalnews.com.
- ◆ Newsletter subscription box in footer — "Subscribe to IGN Weekly Newsletter".

■ Suggested Additions:

- Add a "Download App" button row (App Store + Play Store) once mobile app is released.
- Include a "Sector Directory" quick-link grid in the footer — all 20 sectors listed for SEO benefit.
- RSS feed link for each sector — helps attract aggregators and increases content distribution.
- Footer trust badges: SSL Secure, Privacy Shield, Press Council of India (if applicable).

Note: Footer is often neglected but is critical for SEO, legal compliance, and trust signals.

05

Mobile Navigation Bar (Bottom)

Navigation · Mobile

Pre-Launch

- ◆ Bottom tab bar for mobile — standard 4–5 icon tabs.
- ◆ Suggested tabs: Home (Feed) · Headlines · Trending · My News · Profile.
- ◆ Hamburger icon in top-right opens slide-in drawer menu for Categories and extended navigation.
- ◆ Active tab highlighted with TEAL colour and icon fill.
- ◆ Badge counter on Headlines/Trending for unread count.

■ Suggested Additions:

- Add a "Quick Share" floating action button (FAB) in mobile — lets reader share article instantly.
- Haptic feedback on tab switch for native app feel.
- Swipe-left/right gesture to switch between Feed sub-tabs (Sector / Country / Leader).

B. READER ONBOARDING & AUTHENTICATION

06

Sign-Up / Registration Flow

Onboarding · Auth

Core

- ◆ Step 1: Basic info — Name, Email, Password (or OAuth: Google / LinkedIn login).
- ◆ Step 2: Interest Selection — Sector News selection (max 2 free, up to 20 paid).
- ◆ Step 3: Industry selection within chosen sectors (5–10 industries per sector for free).
- ◆ Step 4: Country News selection — bilateral country list (195 options, sorted by trade volume, alphabetical toggle).
- ◆ Step 5: Leader News selection — 25 designation options sorted by seniority.
- ◆ Step 6: Plan Selection — Free Plan pre-selected; upgrade options shown with feature comparison.
- ◆ Progress bar visible throughout (e.g. Step 2 of 6).
- ◆ Skip option on each step — skipped steps default to most popular/trending selections.
- ◆ Email verification required before full access granted.

■ Suggested Additions:

- Add LinkedIn OAuth — essential since IGN targets business/C-suite readers.
- Show "X readers in your industry" social proof during sector selection to encourage completions.
- Animate interest selection with smooth card flip / tick animation to make it feel premium.
- After sign-up, show a personalised "Your Feed is Ready" splash screen before entering the app.
- Add referral code field at sign-up — incentivise word-of-mouth growth.

Note: Interest selection at sign-up directly powers the Feed algorithm — critical to get right.

07

Login Page

Auth · Security

Core

- ◆ Email + Password login.
- ◆ Google OAuth and LinkedIn OAuth options.
- ◆ Forgot Password → OTP / reset link via email.
- ◆ Remember me checkbox — 30-day session.
- ◆ "New to IGN? Sign Up Free" CTA below login.

■ Suggested Additions:

- Add biometric login (fingerprint / Face ID) for mobile app.
- Show last login device + date for security awareness.
- Two-factor authentication (2FA) option for Corporate plan readers.

08

Reader Profile / Dashboard

Reader Account · Personalisation

Core

- ◆ Display: Name, Profile photo, Plan badge, Member since date.
- ◆ Editable interest selections — can update Sector News, Country News, Leader News at any time.
- ◆ Reading history — articles read in last 30 days.
- ◆ My News section: Favourites, Bookmarks, Read Later, Comments, Likes.
- ◆ Subscription management — current plan, upgrade/downgrade, billing history.
- ◆ Notification preferences — choose which topics trigger push/email alerts.
- ◆ Account settings: Change password, email, 2FA, delete account.

■ Suggested Additions:

- Add a "Reading Streak" gamification widget — e.g. "7-day streak! ■" to drive daily retention.
- Show a personalised "Your Industry Stats" widget — how many CEO/Pharma articles this week.
- Add "Suggested Topics to Follow" based on reading behaviour.
- "Achievements" badges (e.g. "Explorer: Read 5 different sectors") for engagement.

C. CONTENT DISPLAY — CORE TABS

- ◆ Default landing page after login.
- ◆ Shows ALL news from reader's selected categories — no weightage; pure latest order.
- ◆ Three sub-tabs inside Feed: Sector News Feed | Country News Feed | Leader News Feed.
- ◆ Default active sub-tab: Sector News Feed.
- ◆ Each article card shows: Headline, thumbnail image, sector/country/leader tag, source, timestamp, read-time, like count, comment count.
- ◆ "You are missing out on X more sectors" block — clicking shows Upgrade Now prompt.
- ◆ Infinite scroll or paginated (Load More button) — UX decision pending.
- ◆ Pull-to-refresh on mobile.

■ Suggested Additions:

- Add a "Just Published" badge on articles less than 1 hour old.
- Show a "Curated for You" label on the Feed header to reinforce personalisation value.
- Allow reader to temporarily "Mute" a topic/source directly from Feed (3-dot menu per card).
- Add swipe-right to bookmark, swipe-left to dismiss gesture on mobile article cards.
- "Top Readers This Week" widget within Feed for community building.

- ◆ Shows selected category news RERANKED by likes + comments weightage — most discussed first.
- ◆ Also shows "Associated News" — content from categories related to (but not identical to) reader's selection.
- ◆ Three sub-tabs: Sector News Headlines | Country News Headlines | Leader News Headlines.
- ◆ Associated articles tagged with a visual label: "Related to your interests".
- ◆ Non-selected content that appears (associated) triggers Upgrade Now when clicked.
- ◆ Macroscopic view — wider than Feed (Feed=micro, Headlines=macro).

■ Suggested Additions:

- Add a "Why am I seeing this?" tooltip on associated articles — explains the connection.
- "Most Commented Today" widget at top of Headlines for immediate engagement.
- Featured article banner (large card) at top of Headlines — most discussed article of the day.
- Show comment preview snippets on article cards in Headlines to drive click-through.

11

Trending Page

Content · Core Tab

Core

- ◆ Shows ALL content across all 6 types (Sector, Industry, Country, Bilateral Country, Leader, Designation) — irrespective of reader selection.
- ◆ Ranked purely by likes + comments weightage.
- ◆ Three sub-tabs: Sector News Trending | Country News Trending | Leader News Trending.
- ◆ Non-selected articles visible as previews — full read requires Upgrade Now.
- ◆ Time filter: Trending Today | This Week | This Month.

■ Suggested Additions:

- Add a "Trending Heatmap" widget — visual grid of all 20 sectors coloured by activity level.
- "Viral Alert" badge on articles that gained 100+ likes in under 2 hours.
- Allow readers to share trending articles natively with a pre-filled social caption.
- Show trending country flag icons for a visual "Country Pulse" widget.
- "Trending Leaders" — top 5 most-discussed C-suite designations this week.

12

Categories Page

Content · Navigation

Core

- ◆ Accessible from Mega Menu → Categories dropdown.
- ◆ Three sub-pages: Sector News | Country News | Leader News.
- ◆ Sector News page: Grid of all 20 sectors; clicking a sector shows industry list and articles.
- ◆ Country News page: List of 195 bilateral pairs (default: trade volume order, alphabetical toggle).
- ◆ Leader News page: Grid of 25 designations; clicking opens all articles for that designation.
- ◆ Free readers can browse all categories but see Upgrade Now when clicking locked sectors/countries.
- ◆ Each category card shows: name, article count, trending indicator.

■ Suggested Additions:

- Add a "Most Active Category This Week" highlight badge on one sector card.
- Show a mini bar chart on each sector card — article volume over last 7 days.
- Search within categories — let readers filter sectors/countries/designations by keyword.
- "Explore Related" button on each category — shows connected sectors (e.g. Pharma → Manufacturing).

- ◆ Accessible from Mega Menu → My News.
- ◆ Sub-sections: My Favourites | My Bookmarks | My Read Later | My Comments | My Likes.
- ◆ My Favourites: Reader-starred articles, stored permanently.
- ◆ My Bookmarks: Quick-save articles for later — synced across devices.
- ◆ My Read Later: Queue of articles to read — with estimated read time.
- ◆ My Comments: All comments the reader has made across IGN.
- ◆ My Likes: All articles the reader has liked.
- ◆ Export option: Download reading history as PDF (Leader/Corporate plan).

■ Suggested Additions:

- Add "My Notes" — readers can add private annotations to saved articles.
- "Reading Goals" widget — set a weekly article target (e.g. 10 articles/week).
- "My Digest" — auto-generated weekly PDF summary of reader's saved content emailed on Sunday.
- Collections/Folders inside My Bookmarks — organise saves by project or topic.

D. ARTICLE / CONTENT COMPONENTS

- ◆ Thumbnail image (16:9 ratio) — left or top depending on layout.
- ◆ Headline text — bold, max 2 lines, truncated with ellipsis.
- ◆ Category tag — coloured chip (Sector / Country / Leader) with sector name.
- ◆ Source attribution (for RSS AI content) or "IGN Exclusive" for Manual AI content.
- ◆ Timestamp — "2 hours ago" format.
- ◆ Estimated read time — "3 min read".
- ◆ Like count + Comment count — icon + number.
- ◆ Bookmark icon (quick save) — toggles on click.
- ◆ Share icon — opens share sheet.
- ◆ 3-dot menu: Mute topic, Report, Not Interested.

■ Suggested Additions:

- Add a "Premium" lock icon overlay on articles beyond free plan limit — visual incentive to upgrade.
- Show "Trending ■" badge if article is in top 10 trending.
- Author avatar if article is Manual AI / human-authored (builds credibility).
- Reading progress bar on article cards for articles partially read.

- ◆ Full article body with proper typography — H1, H2, body, pull quotes.
- ◆ Hero image at top with caption.
- ◆ Article metadata: Author/Source, Date published, Last updated, Read time, Category tags.
- ◆ Social share buttons: LinkedIn, WhatsApp, Twitter/X, Copy Link.
- ◆ Like button + count | Comment button + count | Bookmark button.
- ◆ Related articles section at bottom — "More in [Sector Name]".
- ◆ Cross-navigation: "Explore this sector on India Global Expo →" CTA at end of article.
- ◆ For RSS AI articles: "Source: [Publication]" attribution footer.
- ◆ For Manual AI articles: "Author: [Writer Name] | IGN Editorial" byline.
- ◆ Text resize option (A- / A+) for accessibility.

■ Suggested Additions:

- Add a sticky "Table of Contents" for long articles (Leader Interviews, Corporate Reports).
- "Listen to Article" audio button — text-to-speech for commuter readers.
- Translation toggle — read article in Hindi or regional language.
- "Ask IGN AI" button — reader can ask a question about the article and get AI-powered answer.
- "Companies Mentioned" tag cloud at bottom — links to company profiles (future feature).
- Print-friendly / PDF export option for Corporate plan readers.

- ◆ Global search accessible from header search bar on all pages.
- ◆ Real-time autocomplete suggestions as reader types.
- ◆ Search results filterable by: Content Type (Sector/Country/Leader), Date Range, Most Recent, Most Popular.
- ◆ Search within: Articles, Leaders, Sectors, Countries, Companies.
- ◆ Recent searches saved (last 10 searches).
- ◆ No results state: "Try broader terms" + "Trending searches" suggestions.

■ Suggested Additions:

- Voice search support — especially for mobile.
- "Search Insights" for Corporate plan — see what topics are being searched most in their sector.
- Saved search alerts — "Notify me when new articles match this search" option.
- Instant answer cards for high-frequency queries (e.g. search "CEO Pharma India" → shows top 5 CEOs directly).

E. READER ENGAGEMENT & SOCIAL COMPONENTS

17

Comments System

Engagement · Community

Core

- ◆ Threaded comments on all articles.
- ◆ Reader can like a comment, reply to a comment, report a comment.
- ◆ Comment count shown on article card and article detail page.
- ◆ Moderation: Comments reviewed before publish (or auto-moderated with flag system).
- ◆ Reader's own comments visible in "My News → My Comments".
- ◆ Rich text: Bold, italic, links in comments.

■ Suggested Additions:

- "Expert Verified" badge on comments from verified Leader Plan / Corporate subscribers.
- Upvote/Downvote on comments — best comments float to top.
- "Comment of the Week" feature in newsletter — drives community participation.
- AI comment summariser for articles with 50+ comments — "What readers are saying..."

18

Like / Reaction System

Engagement

Core

- ◆ Single "Like" (thumbs up) on articles — used as weightage signal for Headlines and Trending ranking.
- ◆ Like count visible on article card and article page.
- ◆ Reader's liked articles stored in My News → My Likes.

■ Suggested Additions:

- Expand to multi-reaction: Like ■, Insightful ■, Important ■■, Agree ■ — richer signal for the algorithm.
- Show "X people in your sector liked this" for social proof.
- "Hot Right Now" label appears automatically when an article gets 50+ likes in 1 hour.

19

Share & Social Amplification

Engagement · Growth

Core

- ◆ Share buttons on every article: LinkedIn (primary), WhatsApp, Twitter/X, Copy Link.
- ◆ Share generates a branded preview card with IGN logo and article thumbnail.
- ◆ Shareable links track source (UTM parameters) for analytics.

■ Suggested Additions:

- "Share as Image" — generate a branded quote card from article highlights (like Instagram stories).
- WhatsApp Business integration for IGN editorial digest sharing.
- LinkedIn native article sharing with auto-filled caption.
- Share count visible on article cards — adds social proof.

- ◆ In-app notification bell — shows count of unread alerts.
- ◆ Push notifications for web (PWA) and mobile app.
- ◆ Email notifications (daily digest or real-time — reader chooses).
- ◆ Trigger events: New article in selected sector, Breaking news, Comment reply, Like on reader's comment, Subscription renewal.
- ◆ Notification preferences fully customisable in Reader Profile.

■ Suggested Additions:

- "Morning Briefing" scheduled notification — 7 AM daily summary of top 5 articles in reader's sectors.
- "Breaking: [Headline]" real-time push for articles marked urgent by editorial.
- WhatsApp notification channel option (separate opt-in).
- Smart notification throttling — cap at 3/day to avoid notification fatigue.

F. MONETISATION & SUBSCRIPTION COMPONENTS

- ◆ Four plans displayed side-by-side: Free | Reader (R) | Leader (L) | Corporate.
- ◆ Feature comparison table — rows: Selection limits, Full article access, My News features, Cross-sector analysis (Corporate), Multi-user (Corporate), Featured Profile (Leader), API access (Corporate).
- ◆ Monthly / Annual billing toggle — annual at discounted rate.
- ◆ "Most Popular" badge on Reader Plan.
- ◆ "Best for Business" badge on Corporate Plan.
- ◆ Secure payment: Razorpay / Stripe integration.
- ◆ Invoice / GST billing for Corporate plan.
- ◆ Free trial option for Reader plan (7-day).

■ Suggested Additions:

- Add a "Which plan is right for me?" interactive quiz — 3 questions → recommended plan.
- Show live subscriber count under each plan for social proof ("2,400+ Readers").
- Corporate plan enquiry form instead of direct payment — sales-assisted onboarding.
- "Refer a friend, get 1 month free" — viral growth mechanism.
- Gifting option — "Gift a Reader Plan subscription".

22

Upgrade Now Prompts (Paywall)

Monetisation · Conversion

Core

- ◆ Triggered in Feed when free reader's "missing out" block is clicked.
- ◆ Triggered in Headlines when reader clicks associated/non-selected content.
- ◆ Triggered in Trending when reader clicks any article beyond free plan limits.
- ◆ Triggered in Categories when reader clicks a locked sector/country/leader.
- ◆ Prompt shows: Benefit statement + Plan comparison strip + "Upgrade Now" CTA button.
- ◆ Dismissible with X — does not block the entire page.
- ◆ Soft paywall: Reader can see article headline and first 2 sentences; rest is blurred.

■ Suggested Additions:

- A/B test different paywall messages — urgency ("X readers upgraded today") vs benefit-led.
- Exit-intent paywall — when reader is about to leave, show a "Wait, here's 1 month free" offer.
- Countdown offer timer (24-hour deal) on paywall — drives urgency.

23

Top News (Paid Placements)

Monetisation · Revenue

Post-Launch

- ◆ Dedicated "Top News" section — companies/brands pay for top placement.
- ◆ Will appear in Mega Menu as 6th item once activated (currently placeholder).
- ◆ Clearly labelled as "Sponsored" or "Partner Content" — editorial integrity maintained.
- ◆ Placement tiers: Homepage Top News, Sector Top News, Country Top News.
- ◆ Campaign management portal for corporate advertisers to submit and track placements.

■ Suggested Additions:

- Native advertising format — styled as articles, not banner ads, for higher engagement.
- Performance dashboard for advertisers: views, clicks, read-time on their paid content.
- Sector-targeted placements — Pharma company pays to be Top News in Pharma Sector only.

24

Paid Leadership Interview

Monetisation · Content Revenue

Post-Launch

- ◆ Leaders / companies pay for a featured long-form interview published on IGN.
- ◆ Interview formatted as premium article — "Leader Spotlight" tag.
- ◆ Appears in Leader News category and in relevant Sector News.
- ◆ Leader Plan subscribers get discounted interview rates.
- ◆ Submission form: Leader details, topic, preferred publish date, word count.

■ Suggested Additions:

- Video interview option — embedded video + transcribed article for maximum engagement.
- "Leader of the Month" showcase — highest-read interview gets homepage feature.
- Packaged bundle: Paid Interview + Paid Podcast + Press Release = "Leader Visibility Package".

25

Paid Podcast Module

Monetisation · Content Revenue

Post-Launch

- ◆ Sponsored podcasts hosted and published on IGN platform.
- ◆ Podcast listing page — episodes by sector, country, leader topic.
- ◆ Audio player: play, pause, seek, speed control (1x, 1.5x, 2x), download (paid).
- ◆ Each podcast has show notes, transcript, and related articles.
- ◆ Podcast accessible in mega menu or dedicated "/podcast" page.

■ Suggested Additions:

- Subscribe to podcast series — push notification when new episode drops.
- "IGN Podcast Network" branding — multiple shows under one umbrella.
- Spotify / Apple Podcasts distribution in addition to native player.
- Listener count shown publicly — motivates sponsors to buy more episodes.

26

Paid Company Press Release (PR)

Monetisation · Content Revenue

Post-Launch

- ◆ Companies submit press releases via a paid portal — reviewed and published by IGN editorial.
- ◆ Published under "Company PR" or "Partner Announcement" tag.
- ◆ Appears in relevant Sector News, Country News, and in Top News if premium tier purchased.
- ◆ PR submission form: Company details, press release body, contact, payment.
- ◆ Analytics dashboard for companies: Views, shares, reader demographics on their PR.

■ Suggested Additions:

- Press Release templates — companies choose a format; IGN AI helps polish the language.
- "Verified Company" badge on all PR articles — builds reader trust.
- Distribution amplification add-on: Company can pay extra for email newsletter inclusion.

G. CONTENT MANAGEMENT & ADMIN

27

CMS — Admin Panel

Backend · Content Management

Infrastructure

- ◆ Article creation, editing, scheduling, and publishing interface.
- ◆ Assign articles to categories: Sector News, Country News, Leader News + specific sub-tags.
- ◆ Mark articles as: Manual AI Content | RSS AI Content | Sponsored / PR | Podcast.
- ◆ SEO fields per article: Meta title, Meta description, Keywords, Canonical URL.
- ◆ Approval workflow: Writer submits → Priyanshi reviews (quality) → Ritu approves (quantity) → Publish.
- ◆ Bulk publish, bulk categorise tools for high-volume content days.
- ◆ Editorial calendar view — planned articles by date and sector.
- ◆ Dashboard: Articles published today, pending review, flagged comments, active readers.

■ Suggested Additions:

- AI-assisted SEO scoring per article — shows SEO score before publish.
- Duplicate content checker — flags if RSS AI has pulled similar content twice.
- Writer performance dashboard — articles per writer, average read-time, likes earned.
- Automated "Trending Alert" in CMS when a topic spikes — prompts editorial to assign a story.

- ◆ RSS feed aggregator — pulls articles from configured news sources on a schedule (every 15–30 min).
- ◆ AI rewriter: Takes RSS content → rewrites in IGN tone/style → generates headline, summary, tags.
- ◆ Auto-category assignment based on content analysis (Sector, Country, Leader tagging).
- ◆ Duplicate detection — prevents same story from being published twice.
- ◆ Quality gate: Auto-published if confidence score > threshold; else sent to human review queue.
- ◆ Source attribution preserved on all RSS AI articles.
- ◆ Managed by: Ritu, Priyanshi, Sanjay, and interns.

■ Suggested Additions:

- Configurable source whitelist — only trusted publications in the RSS feed list.
- Sentiment analysis layer — flag negative/controversial articles for manual review before publish.
- Topic velocity tracking — if 5+ sources cover the same topic in 1 hour, auto-flag as breaking.
- Multi-language RSS support — Hindi business news sources included.

- ◆ Writer selects topic area: Sector, Industry, Country pair, or Leader designation.
- ◆ Writer formulates prompt based on IGN editorial angle and journalistic perspective.
- ◆ AI generates article draft — writer reviews, edits, and enhances.
- ◆ Completed draft submitted to CMS for Priyanshi's quality review, then Ritu's approval.
- ◆ Target output: 20–25 articles per writer per 8-9 hour shift.
- ◆ All content is 100% reviewed by human editor before publishing.
- ◆ Prompt library maintained by editorial team — best-performing prompts shared internally.

■ Suggested Additions:

- IGN Prompt Playbook — internal document of standardised prompts per sector/content type.
- Writer dashboard with daily target tracker (0/20 articles today).
- AI hallucination checker — automated fact-flag for claims that need verification.
- Style guide enforcement AI layer — checks tone/voice consistency before submission.

- ◆ Total readers (free vs paid breakdown), daily active readers, monthly active readers.
- ◆ Most-read articles, most-liked, most-commented — by sector, country, and leader type.
- ◆ Subscription conversion rate — free to paid.
- ◆ Top performing sectors by readership.
- ◆ Geographic distribution of readers.
- ◆ Content performance: RSS AI vs Manual AI engagement comparison.

■ Suggested Additions:

- Real-time "Live Now" dashboard — how many readers are on site this minute.
- Cohort analysis — retention curve for readers who joined in each month.
- Revenue dashboard — subscriptions + paid placements + PR revenue on one screen.
- Heatmap of article scroll depth — understand how far readers actually read.

- ◆ Sitemap auto-generated and updated daily — submitted to Google Search Console.
- ◆ Structured data (Schema.org): NewsArticle, BreadcrumbList, Organisation markup on all pages.
- ◆ Open Graph + Twitter Card meta tags on all articles for rich social previews.
- ◆ Canonical URLs — prevents duplicate content issues from RSS-sourced articles.
- ◆ Page speed optimisation: Lazy loading images, CDN for static assets, Core Web Vitals compliance.
- ◆ robots.txt configured — crawl budget optimised.

■ Suggested Additions:

- AMP (Accelerated Mobile Pages) for article pages — higher Google ranking for mobile.
- Google News submission — India Global News should be indexed in Google News feed.
- Internal linking strategy: Every article links to 3 related articles and 1 sector page.
- FAQ schema on sector pages — can appear in Google Featured Snippets.

I. IGN ↔ IGE CROSS-PLATFORM INTEGRATION

- ◆ Every sub-menu of every Mega Menu item in IGN contains an "Explore Expo →" link to indiaglobalexpo.com.
- ◆ Every page body (three sub-tabs) includes an "Explore on IGE" tab/button.
- ◆ Sector article pages show a widget: "Related Exhibitors on India Global Expo" — pulls from IGE database.
- ◆ Reader profile synced between IGN and IGE — single sign-on (SSO) across both platforms.
- ◆ When reader selects a sector in IGN, matching trade events/expos on IGE are suggested.

■ Suggested Additions:

- IGN Homepage widget: "Upcoming Events at India Global Expo" — live event listing from IGE.
- Joint newsletter: "IGN + IGE Weekly Digest" — combines top news + upcoming trade events.
- Unified search: Typing a sector name in IGN search also surfaces IGE events in results.
- "News + Expo Bundle" subscription — single plan covering both platforms at a discount.

■ ADDITIONAL SUGGESTIONS FROM PRODUCT ANALYSIS

■ Homepage (Non-Logged-In)

- Dedicated homepage for visitors who have not signed up — show value proposition, sample articles, and prominent Sign Up CTA.
- Above-the-fold: "India's Premier B2B News Platform" tagline + hero image + Email sign-up form.
- "As seen in" or press mention strip for credibility if available.
- "Today's Top 5 Headlines" — free preview of 5 articles to drive sign-up intent.

■ PWA (Progressive Web App)

- Build IGN as a PWA from Day 1 — works offline, installable on home screen, push notifications without a native app.
- Reduces need for a separate iOS/Android app for Phase 1 — faster time to market.
- PWA service worker caches last 20 articles for offline reading.

■ Newsletter Engine

- "IGN Weekly" email newsletter — automated, sector-personalised digest sent every Monday morning.
- "IGN Daily Briefing" optional add-on — 5 top stories every morning via email.
- Paid newsletter tier — exclusive deep-dives not published on the website.
- Newsletter builder in CMS — drag-and-drop editor for editorial team.

■ Gamification & Loyalty

- Reading streak tracker — "7-day streak, keep it up!" with streak shield (don't break the streak).
- Reader Badges: "Sector Expert" (read 50 articles in one sector), "Globe Trotter" (read 10 different country news), "Leader Watcher" (read all 25 designation types).
- Monthly leaderboard: "Top Readers This Month" — drives engagement and community.
- Loyalty points redeemable for subscription discounts.

■ Breaking News System

- Editorial can flag any article as "Breaking" — triggers immediate push notification to all relevant subscribed readers.
- Breaking news ticker/banner displayed at top of all pages when active.
- "Breaking News" appears as first item in Headlines and Trending automatically.
- Auto-expires Breaking tag after 6 hours unless renewed by editorial.

■ Multilingual Support

- Hindi language version of the full platform — translates UI and articles.
- Regional language support for top 5 Indian languages in Phase 2.
- Language preference saved in reader profile.
- Auto-translate button on any article — powered by Google Translate API or DeepL.

■ Performance & Infrastructure

- CDN (Content Delivery Network) — Cloudflare or AWS CloudFront for fast global load times.
- Image optimisation — WebP format, responsive sizes (thumbnail/medium/large).
- Database: PostgreSQL for structured data; Redis for caching trending/feed queries.
- API-first architecture (REST or GraphQL) — enables future mobile app without rebuilding backend.
- Load testing before launch — simulate 10,000 concurrent readers.
